

HEAT NETWORK EFFICIENCY IMPROVEMENT SERVICES

BRACE YOURSELF! IN ANTICIPATION OF THE FORTHCOMING OFGEM HEAT NETWORK REGULATIONS

A significant number of Heat Networks across the UK currently operate at subpar efficiency levels.

Is yours among them?

Worry not, as Evinox is here to provide an array of comprehensive Heat Network efficiency improvement services:

SURVEY

Conducting an initial site survey accompanied by a concise report, including data collection with market leading methods and tools.

REPORT

Delivering a comprehensive report featuring suggested improvements and upgrades to your heat network, impressive data analysis and efficiency modelling charts for easy reading.

ASSIST

Assisting with government funding (HNES) applications, including:

- Grant application for optimisation studies
- Capital grant funding application

Expected Ofgem Regulation and Enforcement measures for 2024;

- Digitalisation of Heat Networks - Annual Heat Network performance reports to be submitted to Ofgem for review (including efficiency, occupancy, planned and unplanned interruptions)
- Heat supplier licences will be required. (Not all will be granted without heat network review including up to date heat network compliance – Heat Network (Metering and Billing) Regulations 2014)
- Statutory minimum technical standards for all existing Heat Networks
- Heat energy will be regulated in line with gas and electricity
- Enforcements to include: on-site audits/ energy sale price caps/ fines...!! Potential to exceed technical standards installation costs
- Enforcement notices to be sent to Managing Agents and Heat Network Operators for non-compliant systems

Are you among the 90% of underperforming Heat Networks in the UK? Contact us for a confidential Teams call to assist you in:

1. Heat Network regulation compliance
2. Efficiency improvement recommendations
3. Enhancing resident relations
4. Achieving substantial carbon emission reductions
5. Decreasing your energy bills...£££
